

CD 3050

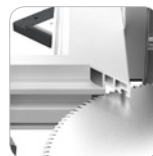

2 Axes CNC Corner Cleaning Machine

General Features

- It is designed to clean PVC frame corners made of 90° angle.
- Cleaning of a corner in min. 9 sec. - max.18 sec. according to profile type.
- Robust mechanical design suitable for high speed production.
- Maximum performance thanks to high quality materials used on its production.
- Automatic greasing system.

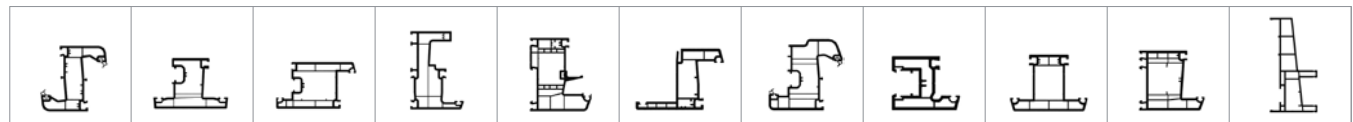

Optional Equipments

- TK 100 Lame Sash Cleaning: Unique for its speed and quality as it is programmable.

- Automatic line can be made by combining with 4 head welding machine, cooling unit, rotating robot and unloading unit.

Profile shapes to be processed.

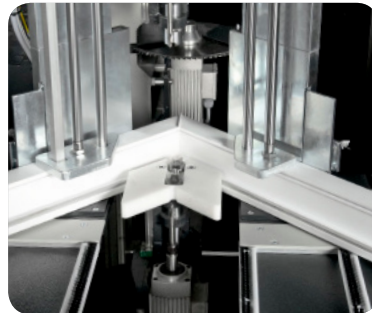

- The product has patented features.

- Software which allows to create receipts at laminated-unlaminated, with gasket-without gasket categories.
- Machine parameters and receipt creation operations.
- Expandable memory with a capacity of 250 different profiles.
- Portable user friendly screen.
- Periodical maintenance reminder function.

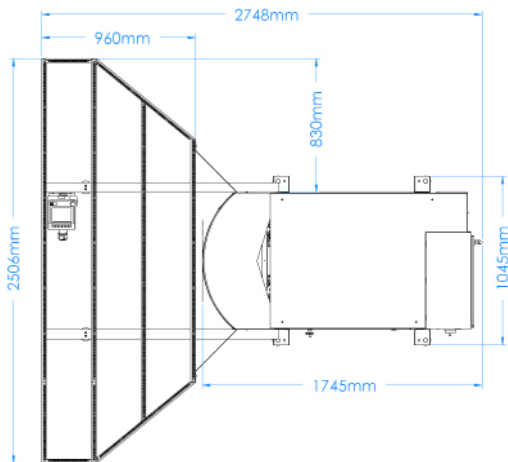

- Special design tools clean top, bottom and inner parts of frames.
- Cleans inner parts of sill frames.
- High quality cleaning of top and bottom parts of laminated and unlaminated profiles with different tools.

- Automatic profile defination feature thanks to measuring and control systems.

- Cleaning of 100 mm renovation frame with 230 mm saw.
- Cleaning of welding chips at outer corner of frame.
