

### General Features

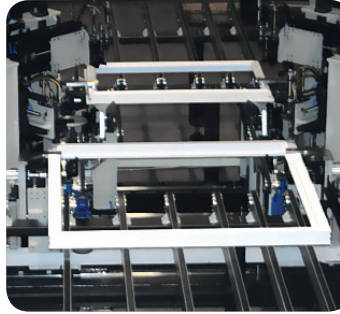

- Cleaning of 90° PVC frames corners.
- Robust mechanical design suitable for high speed production.
- Maximum performance thanks to high quality materials used on its production.
- Automatic greasing system.
- Conveys the profiles without damaging thanks to loading and unloading conveyors.

- The product has patented features.

- Software which allows to create receipts at laminated-unlaminated, with gasket-without gasket categories.
- Machine parameters and receipt creation operations.
- Expandable memory with a capacity of 250 different profiles.
- Portable user friendly screen.

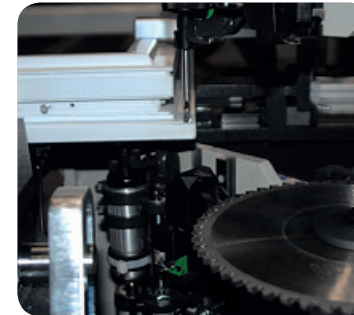

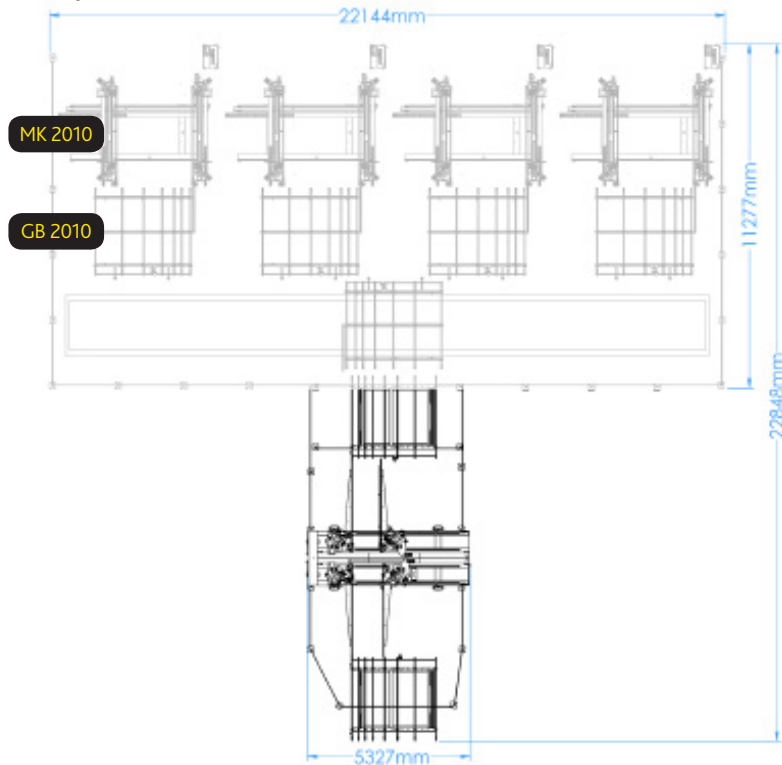

- 4 pieces of 4 axes CNC units which position automatically in order to clean different dimensioned frames.
- Saving of time and place as it cleans 4 corners at the same time.

- High performance cleaning on four corners with 44 tools.

4 x 4 Layout

- Cleaning of outer corner welding chips of frames.
