

General Features

- Precise cutting of PVC profiles with servomotor between 22,5°-90° outer angles with 0,01° precision.
- Right feeding unit and automatic saw safety cover.
- Double clamping system on both heads to fix the profile.
- Support plate between two heads to support the profile.
- Special design vacuum system to cut without depositing sawdusts on heads.
- Profile height measurement system.
- Adjustable saw progress speed.
- Frontal and top clamping systems.
- Precise and fast measure positioning thanks to brake system.
- Automatic slicing system.

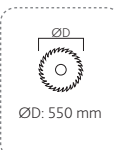

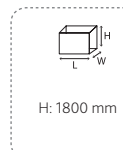

Optional Equipments

- BY 100 Barcode Printer
- E 100 Barcode Printer (ethernet)

- KP 100 Cutting Program

- On auto mode, it goes to position without operator intervention.
- Option to work with SD Card.
- 1250 different cutting length memory capacity.

- Hydropneumatical system provides precise cutting quality.
- Horizontal and top profile clamping and practical piston place adjustment system.
- Adjustable saw speed.
